

- Effective tools of active labour market policies during the crisis
- Michal Páleník
- www.iz.sk
 - EESC, 5th March 2013

- central Europe, €
- 2 343 employed
 - 2 000 in SK
- 372 unemployed
 - 94 4+years

- EU27 – one in 22
- (Austria 1/90, Netherlands 1/82)
- Czech republic, Poland – 1 in 33
- Hungary – 1 in 18
- **Slovakia – 1 in 10**

Long term unemployment

Rimavská Sobota – 24,4% - 1 in 4

order	code	Region	%
1.	FR91	Guadeloupe	18,77
2.	FR94	Réunion	17,85
3.	FR93	Guyane	15,44
4.	FR92	Martinique	14,81
5.	ES64	Ciudad Autónoma de Melilla	12,72
6.	SK04	Eastern Slovakia	12,33 – 1/8
7.	ES63	Ciudad Autónoma de Ceuta	12,3
8.	ES70	Canarias	12,19
9.	SK03	Central Slovakia	10,6 – 1/9

This does not take into account work migration

Long term unemployed profile

- low skilled, low educated
- in underdeveloped region
- low assets, small savings,
- (some of them are Roma, some of them in segregated settlements)
-

- since 2004, several 100 thousands
- still registered unemployed
- fixed reward of 60€/mo per 10 hours of work/week
- fixed subsidy to villages
- control of process, not results
- **social lockin effect**

Reconstruction of castles

- in 2011
- 2 castles
- real working contract
- (50 people)

- in 2011
- real working contract
- several thousand people
- 200 villages

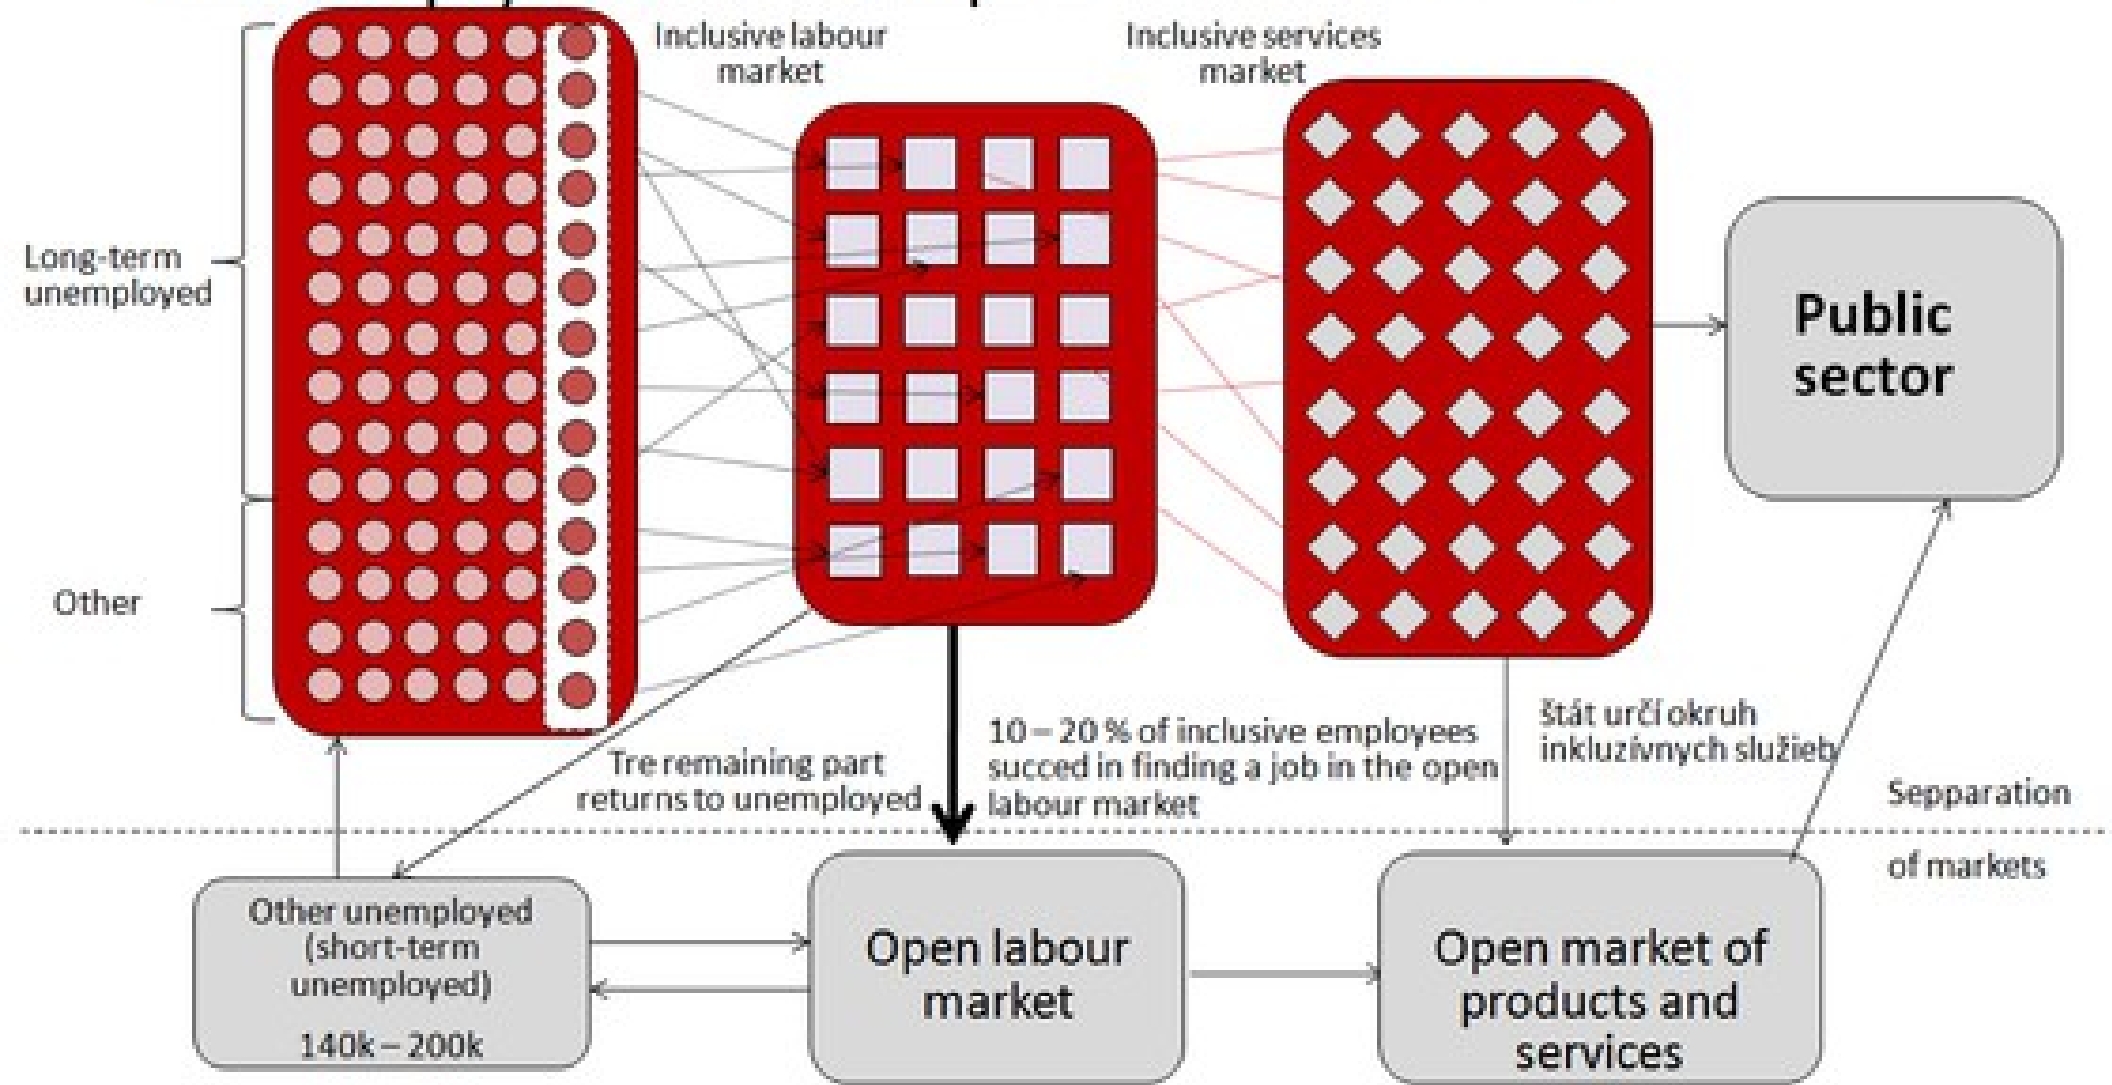

- should
 - synergy effects
 - focused on control of results (not process control)
 - small administration
 - effective in situations where 1 in 4 is applicable

Inclusive market

**Target population 300k,
inclusive employees 50k**

**Inclusive
enterprises**
